Chris Titus Tech's WinUtil Powershell Script

Author	Date	Revision
Caleb Brendel	04/08/2024	1.0

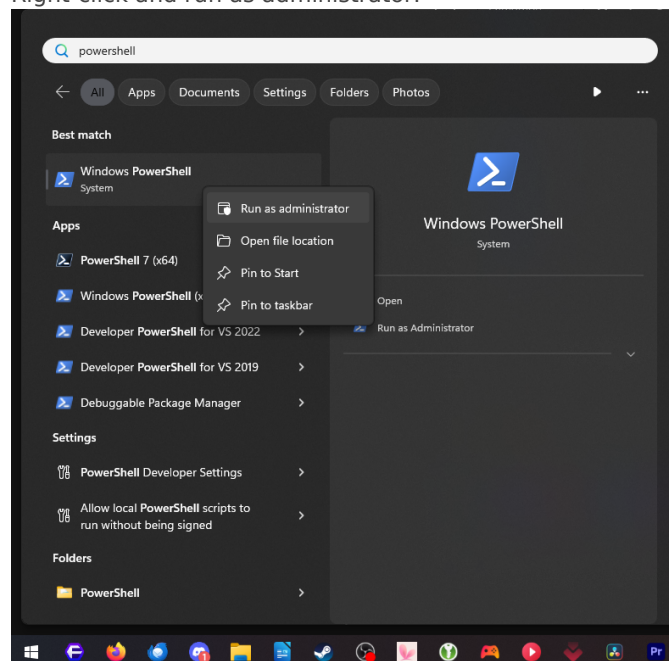

Related product (if any):	
Description:	This script is used to remove "bloatware" on Windows so it can help perform better.
Symptoms:	
Cause:	Wanting to remove Microsoft Store-related apps/services to improve performance on your system.
Files Needed:	No files are needed except for the script to run: irm https://christitus.com/win iex

Steps to Correct:

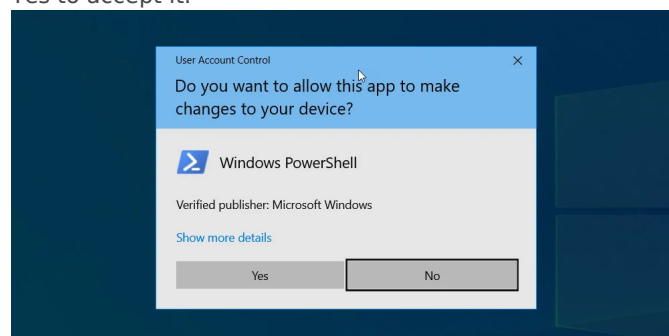

Hit your Windows key on your keyboard and type in powershell.

Right-click and run as administrator.

If you get a UAC prompt to allow Powershell to run, press Yes to accept it.

Copy (Ctrl +C) the following command: **irm https://christitus.com/win | iex**

Now click into Powershell and paste the command you just copied (Ctrl + V)
